

He is an accomplished Assistant Professor of Chemistry with a strong expertise in theoretical and computational chemistry. His research focuses on molecular modeling, quantum chemistry, and computational simulations, contributing to advancements in the field. With a passion for scientific exploration, he has published research papers in prestigious journals, including Molecular Physics and others, showcasing his commitment to cutting-edge chemical research. He holds both his Undergraduate and Postgraduate degrees from St. Joseph's College (Autonomous), Tiruchirappalli, Tamil Nadu. Furthering his academic journey, he earned his Master of Philosophy (M.Phil.) from Bharathidasan University, Tiruchirappalli, Tamil Nadu, solidifying his foundation in advanced chemistry research. As an educator and researcher, Mr. Nichodemus strives to inspire the next generation of chemists, blending theoretical knowledge with computational applications to solve complex chemical problems.
