

He is a passionate and dedicated Assistant Professor with over 8 years of teaching experience in Computer Science. He is committed to fostering a student-centered learning environment through practical, concept-oriented teaching that encourages innovation, critical thinking, and technical excellence.

His areas of interest include Artificial Intelligence, Software Development, Database Management Systems, Object-Oriented Programming, Web Technologies, and Emerging Computing Technologies. He believes in bridging the gap between academic knowledge and real-world applications, enabling students to develop strong analytical and problem-solving skills.

He actively participates in Faculty Development Programmes (FDPs), workshops, seminars, and other academic initiatives to stay updated with emerging technologies and modern teaching practices. Beyond academics, he is dedicated to mentoring students and preparing them with the knowledge, confidence, and practical skills required to excel in higher education and the IT industry.

Areas of Interest: Artificial Intelligence • Software Development • Database Management Systems • Object-Oriented Programming • Web Technologies
